PROFILE

Motivated second-year Computing and Data Science student at Sai University with strong critical thinking, leadership and problem-solving abilities. Interested in cybersecurity, software systems and data-driven technology. Enjoy building practical projects, understanding complex systems and approaching challenges with curiosity, structure and analytical reasoning.

EDUCATION

Sai University - B.Tech / Undergraduate Studies in Computing and Data Science

Currently pursuing second year | CGPA: 9.64

Velammal Vidhyashram - School Education

Academic score: 90%

TECHNICAL SKILLS

Programming	Python, C
Core Concepts	Data Structures, Algorithms, Object-Oriented Programming
Web	HTML, CSS, JavaScript
Database	MySQL
Areas of Interest	Cybersecurity, Data Science, Software Development

FEATURED PROJECTS

SaiUConnect

Web application project designed to improve student connectivity and access to academic information. Focused on building a practical, user-friendly digital platform.

Corporate Org Chart Tool

C-based Data Structures project for representing and managing an employee hierarchy using tree-based concepts, dynamic memory allocation and menu-driven CRUD operations.

Staff Management System

Management-focused software project for organizing and handling staff-related information and operations in a structured system.

ACHIEVEMENTS & ACTIVITIES

- Guinness World Record recognition in Classical Dance
- Participated in State-level Athletics - 100m
- Participated in State-level Athletics - 400m
- Participated in State-level 400m Relay
- Recognition and awards in Singing
- Recognition and awards in Drawing

CORE STRENGTHS

Leadership | Critical Thinking | Problem Solving | Analytical Reasoning | Communication | Adaptability | Creativity | Continuous Learning

CAREER OBJECTIVE

To build a strong career in cybersecurity and technology by applying my analytical abilities, technical knowledge and problem-solving mindset to understand, secure and improve complex digital systems.
