

MEHA E

Computing & Data Science | Aspiring Cybersecurity Analyst

GitHub: github.com/mehaelangomani

PROFILE

Computing and Data Science student at Sai University with a current GPA of 8.67. Interested in programming, data, algorithms, web development, and cybersecurity. Focused on building practical systems, strengthening problem-solving skills, and continuing to learn how technology works beneath the surface.

EDUCATION

Sai University Computing and Data Science	Current GPA: 8.67 Undergraduate
Class XII	87%

TECHNICAL SKILLS

Programming: Python, C, JavaScript

Data & Databases: Pandas, Data Visualization, MySQL, PostgreSQL, Supabase

Web Development: HTML, CSS, JavaScript, React, Vite

Data Structures & Algorithms: Arrays, Linked Lists, Stacks, Queues, Trees, BST, Graphs, Hashing, Searching, Sorting, Recursion

Development Tools: Git, GitHub, VS Code, Vercel, APIs

Cybersecurity: Security fundamentals, authentication, access control, web application security — currently exploring

PROJECTS

SaiUConnect

University-focused web application project using React, Supabase and PostgreSQL. The project includes role-based student, faculty and admin interfaces, authentication, timetable management and academic-data workflows.

C Data Structures Projects

Academic work focused on implementing and applying core data structures and algorithms in C, including linked structures, trees, searching and related problem-solving tasks.

Python Programming & Algorithms

Academic programming work involving Python fundamentals, OOP, recursion, data structures, sorting/searching and algorithmic problem solving.

Data Analysis & Visualization

Coursework involving dataset handling, cleaning, analysis and visualization using Python tools including Pandas, Matplotlib and Seaborn.

ACADEMIC INTERESTS

Cybersecurity • Web Application Security • Data & Systems • Algorithms • Software Development

STRENGTHS

Problem solving • Critical thinking • Leadership • Learning quickly • Persistence

CAREER DIRECTION

Aspiring Cybersecurity Analyst, with an interest in understanding systems, identifying security issues, and building safer technology through code, data, and continuous learning.

This resume intentionally includes only information provided by Meha and does not invent internships, certifications, job experience, project metrics, or other credentials.
